JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Bouvier's Law Dictionary and Concise Encyclopedia

RAWLE'S REVISION 1914

What it offers the Law Student and Young Lawyer

BOUVIER, in the preface to his first edition, sets out in an interesting way the difficulties which he encountered on entering upon the study of the law. While the needs of the law student are much the same today, the means of supplying them are vastly different. The present-day student is beset, as was Bouvier, with two difficulties: First, he must know the meaning of legal words and terms which he encounters in his studies; second, in the study of any subject or topic of the law, he finds references to other branches, subjects or doctrines which he has not yet taken up, and in order to pursue his studies intelligently he must have access to a reference book which gives him this information in elementary but complete form.

As a **dictionary** of the law it is complete and exhaustive, and has served as a model for three-quarters of a century. Bouvier says that he has "defined and explained the various words and phrases by giving their most enlarged meaning, and then all the shades of signification of which they were susceptible."

As a concise and elementary **encyclopedia** of the law, Bouvier's supplies in compact form a general outline of the various legal subjects and doctrines. It supplies the leading cases, and references to the latest cases. In this it has a tremendous advantage over an encyclopedia of the law prepared for the practitioner, which must cite all the cases, and which is necessarily voluminous and inconvenient for the student, who wants but little more than a comprehensive outline of the subject.
